

## European Solar Energy Storage

# Greece a1 energies

## Overview

---

How will Greece transform its energy sector in 2022?

In June 2022, Energy Minister Skrekas stated that 44 billion Euros would be dedicated to the structural transformation of Greece's energy sector which would include increasing renewable energy capacity to 25 GW from the current 9 GW and tripling the volume for LNG storage. The phaseout of lignite plants was delayed until 2028.

Will Greece become a net exporter of energy?

There are multiple high profile electricity interconnector projects in discussion, with two aiming to connect Greece with Egypt for the purpose of exporting renewable energy into Greece and beyond. As Greece further develops these projects, it positions itself to become a net exporter of energy in the region.

How many companies have won support for a battery project in Greece?

Seven companies have won support for 11 standalone battery projects at Greece's second energy storage auction.

How did Greece's grid infrastructure lose value after the financial crisis?

Following the financial crisis, Greece's grid infrastructure lost value in what can be classified as a disinvestment of 150 million Euros a year when there should have been an investment of about 300 to 400 million Euros a year. Greece's target to shift from lignite towards renewable energy sources further propel such efforts.

How many FSRU projects are there in Greece?

There are several FSRU projects at various stages of development throughout the country. One FSRU project, further expanding Revinthoussa's plant (in central Greece) current LNG capacity, is expected to be operational within this year, while another FSRU in Alexandroupoli (northern Greece) is expected to come online in 2023.

Does Greece have a LNG terminal?

Greece has been making inroads into LNG infrastructure development for several years. The 2018 expansion of its LNG Terminal allowed for the nation to receive larger quantities of LNG. This is coupled with another expansion, set to be completed this year.
