## How to install solar panels in Portugal

Thin Film. This type of panel is made up of very thin structures that can be set up on roof tiles, glass, and masonry. Their thinness makes them light and the fact that they are made of amorphous silicon, cadmium telluride, and/or gallium gives them flexibility, also. This option is, most of the time, chosen for aesthetic purposes and large-scale projects, due to its ...

## How Solar Panels Work

How Solar Panels Work. Solar panels work by converting sunlight into electricity through photovoltaic cells. These cells are made of semiconductor materials like silicon, which absorb photons from sunlight. When sunlight hits the cells, it knocks electrons loose from their atoms, creating an electric current.
