Three sources make up the in : , and . Biomass (firewood and ) makes the largest contribution in primary energy consumption. It is locally produced, while Guinea imports all the products it needs. The potential for hydroelectric power generation is high, but largely untapped. Electricity is not available to a high percentage of Guineans, especially in rural areas, and service is intermittent, even in the capita.

What are the main energy sources in Guinea?

Three primary energy sources make up the energy mix in Guinea: fossil biomass, oil and hydropower. Biomass (firewood and charcoal) makes the largest contribution in primary energy consumption. It is locally produced, while Guinea imports all the petroleum products it needs.

What is Guinea's energy strategy?

Includes a market overview and trade data. The Guinean government has announced a long-term energy strategy focusing on renewable sources of electricity including solar and hydroelectric as a way to promote environmentally friendly development, to reduce budget reliance on imported fuel, and to take advantage of Guinea's abundant water resources.

Where can I find information about energy in Guinea?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Guinea on the IndexMundi homepage. Find relevant information for Guinea on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

Where can I find information on renewable power capacity & generation of Guinea?

Find relevant data on Renewable Power Capacity and Generation of Guinea on the homepage of IRENA.org. Climatescope 2019 lists the clean energy policies and investments for Guinea.

What will Guinea's energy mix look like by 2025?

Guinea's energy mix by 2025 will be dominated by hydropower, which would account for over 80 percent of the total installed capacity, should these planned investments be realized. Solar power is also growing in popularity for both corporate and residential use.

What is electricity used for in Guinea in 2021?

No data for Guinea for 2021. Electricity is primarily used for heating, cooling, lighting, cooking and to power devices, appliances and industrial equipment. Further electrification of end-uses, especially transportation, in conjunction with the decarbonisation of electricity generation, is an important pillar of clean energy transitions.

## The Great Chong Mai and Torus Energy Flow

Whole universes have torus-shaped energy flow. A torus is a dynamic flow process, rather than simply a topological surface. In the Tao Te Ching, chapter 11, Lao Tzu said: "Thirty spokes share a wheel's hub, yet it is the center empty space in the hub that makes it function." A wheel also has disks with a center hole, which is torus shaped.
