

European Solar Energy Storage

Harold s solar Mozambique

Overview

What is the market for off-grid solar in Mozambique?

The total estimated addressable market for off-grid solar is currently 173 MW, and is expected to grow in line with the growth of the aforementioned sectors. Recent energy policy reforms are also changing the game for off-grid renewables in Mozambique.

Is Mozambique a good place to invest in solar energy?

Mozambique has an abundant and unexploited solar resource which could be harnessed for utility scale as well as residential PV for both on/off grid electrification. The following map shows the global horizontal irradiation profile of Mozambique which varies between 1,785 and 2,206 kWh/m²/year.

Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

Why did EDM join central solar de Mocuba?

It was also a unique opportunity for EDM to gain technical, commercial and practical experience in utility-scale solar solutions. Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year.

Will Mozambique get a solar power plant in 2023?

Future tenders are expected to be announced in Q4 of 2023, including the selection of two independent power producers for two 30 MW solar photovoltaic power plants and one 50 MW wind power plant. But Mozambique has an enormous challenge that spreads far beyond where the national grid

ends.

Can Mozambique take full advantage of its solar potential?

In a new monthly column for **pv magazine**, SolarPower Europe describes how Mozambique may take full advantage of its huge solar potential by implementing its recently launched Renewable Energy Auctions Programme for large-scale projects, while also pushing for more off-grid renewables in remote areas.
