Overview

Solar energy is part of our plans to accelerate our transition to renewable energy and balance our energy mix across Iowa and Wisconsin. Find more information about our plans in our Energy Blueprint.

Solar energy is part of our plans to accelerate our transition to renewable energy and balance our energy mix across Iowa and Wisconsin. Find more information about our plans in our Energy Blueprint.

We've added approximately 1,500 megawatts of solar energy in Wisconsin and Iowa since 2022. Adding solar to our balanced energy mix is a cost-effective way to generate energy without emitting greenhouse gases. When the sun shines, it provides a constant, abundant supply of energy. In addition.

RENEW Wisconsin and Alliant Energy have agreed to preserve net metering for two years and have created a clear pathway for future rooftop solar installations. At the end of the two-year period, new Alliant solar customers will shift away from net metering and into Power Partnership, a proposal that.

Are you looking to add a renewable energy source to your home or business?

Wind turbines, solar panels and fuel cells are just a few examples of how customers connect to the Alliant Energy distribution system. If you are interested in generating your own energy, please review our interconnection.

US utility Alliant Energy's plans to build two large-scale battery storage projects to pair with solar PV plants in Wisconsin have been approved by regulators. The company said yesterday (9 August) that the Public Service Commission Wisconsin (PSCW) has given the green light to its proposals for.

The volume of solar generation slated to supply power to Wisconsin electricity customers would nearly double if state regulators approve Madison-based Alliant Energy's ambitious plan to acquire six Wisconsin solar farms for its generation portfolio. Alliant's application will be filed shortly.

In spring of 2023, both Madison Gas and Electric and Alliant Energy proposed

changes to how they bill and meter solar customers. The proposed changes would have reduced the amount homeowners were paid for excess energy production pushed back onto the grid, increased the amount of time it took solar. Does Alliant Energy work with a solar installer?

Remember, if you've hired a solar contractor to perform your installation, the installer will work with Alliant Energy on your behalf to submit the appropriate application and complete the interconnection process. Thus, you must remain in constant communication with your installer.

How do customers connect to the Alliant Energy Distribution System?

Wind turbines, solar panels and fuel cells are just a few examples of how customers connect to the Alliant Energy distribution system. If you are interested in generating your own energy, please review our interconnection steps. This process helps ensure you select a system that is right for you and installed safely.

Does Alliant Energy provide an interconnection approval memo?

If approved, Alliant Energy will provide you with an Interconnection Approval Memorandum. This Memorandum has terms and conditions for interconnection of your system, as well as a copy of the standard Interconnection Agreement that will be executed upon completion of all requirements.

How does Alliant Energy Community Solar work?

The renewable energy produced by the solar site is delivered to the grid, where Alliant Energy manages the sale of the energy on the market. All the energy credit is then passed back to all participating subscribers for the life of the facility. Learn more about how Alliant Energy Community Solar works and view frequently asked questions.

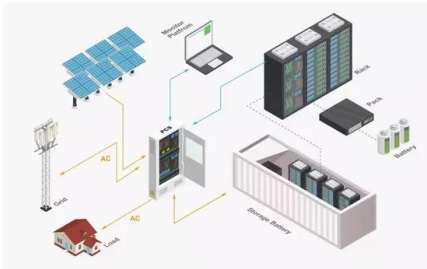

Why does Alliant Energy not provide power if a power outage occurs?

For safety reasons, generation systems that are interconnected to our power grid will not supply power to your home or business if an outage occurs. This protects your equipment from overloading and protects Alliant Energy personnel who may be working on electrical equipment in your area to restore power.

How do I contact Alliant Energy?

You can also call our Customer Service Center at 1-800-ALLIANT (800-255-4268) and request your usage history. To protect the privacy and security of our customers, only the account holder can request this information. Remember Alliant Energy will not provide this information to your solar contractor if they call us on your behalf.
