# High capacity battery for home Morocco

## Overview

---

Over six months after detailing plans for a new 20 gigawatt-hour (GWh) battery plant in Europe, China's Gotion High-Tech has shared precisely where it will set up shop overseas - Morocco .

Over six months after detailing plans for a new 20 gigawatt-hour (GWh) battery plant in Europe, China's Gotion High-Tech has shared precisely where it will set up shop overseas - Morocco .

Rabat - Gotion High-Tech has announced plans to allocate €1.28 billion toward the development of a cutting-edge lithium battery production facility in Morocco. According to Echemi, a global B2B .

In Morocco, Gotion plans to invest up to 1.28 billion euros to build a 20 GWh-capacity plant, following the Moroccan government's endorsement and the signing of an investment agreement in June. The Slovakian venture will see an investment of up to 1.234 billion euros, with a production capacity of 20 GWh of lithium batteries per year.

Chinese company Guoxuan High-Tech Co. has announced plans to establish a high-performance lithium battery manufacturing plant in Morocco, with an annual production capacity of 20 gigawatt-hours. The project, set to support the electric vehicle (EV) industry, is expected to take five years to complete, Chinese media reported on Friday.

The factory's capacity is set to expand to 100 GWh, with a potential total investment of up to \$6.5 billion. Morocco's strategic location, free trade agreements with major markets in the EU and US, and its growing automotive sector make it an attractive site for Chinese EV battery manufacturers.
