Honduras cert systems inc

Honduras cert systems inc

Co-Founder and CTO at CERT Systems Inc

Christine is currently the Co-Founder and CTO of CERT Systems Inc since January 2019. Prior to that, they worked as an NSERC Postdoctoral Fellow at the University of Toronto from January 2017 to January 2021. Christine also worked as an NSERC Graduate Student Research Assistant at McMaster University from September 2011 to August 2016.

CERT Systems Inc , Details , Darcy Partners

CERT utilizes membrane electrode assembly (MEA) electrochemical cells to reduce CO2 into a renewable source of fuels and materials. The company focuses on the design and optimization ...

Transforming the way the world's most important chemicals are made , CERT Systems Inc (CERT) is on a mission to transform the way the world's most important chemicals are made and be a leading player in the transition to a sustainable future. CERT has developed a proprietary electrochemical process that operates ...

CERT Systems named to

Breakthrough Energy Fellows program

CERT Systems founders Alexander Ip and Christine Gabardo have been selected as Breakthrough Energy Fellows, part of the BE network founded by Bill Gates. The BE Fellows program gives global innovators and business experts support to advance the groundbreaking technologies needed to reach net-zero emissions by 2050. With the support of ...

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

About SCS

Founded in 1984 as Ohlone Inc., we became Scientific Certification Systems (SCS) in 1988, a name which better communicated our efforts to apply rigorous science to the task of third-party certification of claims, paying attention to ...

ENERGY STORAGE SYSTEM

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

CERT Systems

CERT Systems General Information Description. Developer of carbon dioxide (CO₂) utilization system designed to catalyze the closure of the carbon cycle. The company's system converts carbon dioxide into fuels and chemical feedstocks using only water and renewable electricity, enabling clients to deeply decarbonize chemical manufacturing.
