

## European Solar Energy Storage

# How many people in america use solar energy

## Overview

---

How many people use solar panels in the US?

The US relies on solar for 3.9% of its energy, although this share is increasing rapidly every year. 3.2 million US homes have solar panels installed. 3,975,096 people are employed in the solar industry worldwide, and 263,883 of these are in the United States.

How many people are employed in the solar industry?

3,975,096 people are employed in the solar industry worldwide, and 263,883 of these are in the United States. The solar energy industry created more new jobs in the US than any other energy subsector last year. It would take around 18.5 billion solar panels to produce enough energy to power the entire US.

How much solar energy does the US use?

4.4% of our global energy comes from solar power. China generates more solar energy than any other country, with a current capacity of 308.5 GW. The US relies on solar for 3.9% of its energy, although this share is increasing rapidly every year. 3.2 million US homes have solar panels installed.

How many solar installations are there in the United States?

In that same year, solar energy accounted for 55 percent of new electricity-generating capacity additions in the North American country. Of the total solar capacity installed in the U.S., over 26 percent corresponds to residential installations. This segment has grown in recent years, reaching some 4.7 million installations in 2023.

How many solar panels would it take to power the US?

It would take around 18.5 billion solar panels to power the entire US in 2025. In a 2017 NGA meeting, Elon Musk famously said that it would be possible to power the entire US by covering one small 100x100 mile square corner of Texas with solar panels.

What percentage of Americans install solar energy in 2023?

Regionally, the percentage varied significantly. U.S. homes installed 6.8 GW of solar energy capacity in 2023, a 12% increase from 2022. Among homeowners without solar power, 66.5% express interest in installing in the future. Notable statistics regarding this cohort include the following:
