# How much can i save with a solar energy system

## Overview

---

How much can you save on solar energy?

Most solar shoppers save between \$34,000 and \$120,000 on electricity over the lifetime of their solar panel system. However, there's an urgency to act now to maximize savings. Recent federal legislation has eliminated the 30% residential solar tax credit after December 31, 2025—nearly a decade ahead of schedule.

How much will solar panels save you over 25 years?

The average U.S. homeowner will save around \$52,000 over 25 years after installing solar panels, but your savings will vary depending on where you live and the cost of electricity in your area. The table below shows our state-by-state solar savings estimates over 25 years.

How do you save money on solar panels?

. chooses to lease solar panels on their partially shaded roof. They'll have fixed monthly payment of \$100 on the panels and avoid paying \$150 per month on their electricity bill, for a net annual savings of \$600. takes out a solar loan to install solar panels and extra mounting equipment on their flat roof.

How do I calculate solar energy savings?

Step 1. Subtract any upfront incentives from the total cost of your solar panel system. Step 2. To calculate the amount you save on electricity, multiply the average monthly cost on your utility bills by 12 to get your annual savings. Subtract any annual incentives according to your solar installer. Step 3.

How much energy can you save a year?

With an estimate of \$1,600 each year in savings, you could easily save \$25,500 to \$33,000 on electricity during the life of your system—and that's if energy prices don't rise. Every household has different energy requirements,

so your savings may end up being slightly different than the average estimate above.

How much does solar energy cost?

1. Average residential electricity price: \$0.16/kWh (U.S. Energy Information Administration, 2025). 2. Solar power system production averages 800-1200 kWh per month for most homes. Many states offer net metering programs, allowing you to earn credits for excess solar energy sent back to the grid.
