How much does solar energy cost per month

Overview

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much money do solar panels save?

How much money you save varies on several factors, including your location, current energy usage, the size of your solar panel system, and, most importantly, the price you pay for electricity. For example, if you currently pay \$150 a month for electricity, you'll save about \$83,000 on bills over the next three decades.

What is the average monthly electricity bill with solar panels?

Let's start with a baseline based on national averages. What is the average monthly electric bill with solar panels?

The average US electricity bill in the first half of 2023 was \$146.92, based on monthly consumption of 881 kWh and the average utility rate of 16.7 cents per kWh per the EIA.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
