How solar energy reduces electricity bills

Overview

To begin, let's identify the three primary problems with electric bills: 1. They're expensive 2. They're continually getting more expensive 3. They're unpredictable We'll go over each problem, and show how solar is a solution to fix it and lower your electric bill.

It may not feel like it, but you're probably paying way more for grid energy than you would be for solar. The price of electricity is measured in cents per kilowatt-hour (kWh). According to the.

Grid electricity rates are already higher than solar, and they will continue to increase over time. By taking these rate hikes into account, solar panels can lower your electric bill even.

To recap, solar panels do two things to reduce your electric bill: 1. They set the price you pay for electricity lower than what you would pay on the.

In the last section we used nice, steady rate hikes to show how grid electricity increases over time. But in reality, grid electricity rates are anything but steady. Take a look at this graph of year-over-year electricity price changes since 2019 from MishTalk. See a pattern?

.

But by using solar panels, you can lower your electric bill by slashing the rate to around 8 cents per kWh — far lower than the price per kWh in any major US metro. Think of going solar as replacing your electricity bill with monthly payments for your solar equipment.
