Are you considering adding solar panels to your home in Newburgh, IN?

Learn how solar works by giving us a call today at (812) 853-9334. We look forward to working with you.

The sun's rays hit the solar panels, which are mounted on the roof of a home or business. Solar panels are composed of photovoltaic (PV) cells. PV cells are made of semiconductor materials. It works by using the energy of the sun's photons to knock electrons loose from their atoms. This creates an.

Newburgh, Indiana, located in the Northern Temperate Zone, presents a moderate potential for solar energy generation throughout the year. The location's solar productivity varies significantly across seasons, with peak performance during summer months. Summer stands out as the most productive.

On average, most solar arrays in Newburgh, Indiana last for 20 to 25 years. This is usually the manufacturer's recommended lifespan for the panels. Even after they reach their end of life, the panels will continue to work but will do so less efficiently. Do Solar Panels Require Maintenance?
