Solar Ovens 101

A solar cooker (AKA solar oven) is an object that concentrates the sun's energy into your food, raising the temperature and turning cold yucky stuff into delicious food.

How To Make A Solar Hot Dog Cooker

How do solar hot dog cookers work? The silver material lining the inside of the cooker makes the molecules bounce off it's reflective surface and heat both sides of the hot-dog. One side is heated by the sun's direct light and then the

other is heated by the sun's light being reflected off the surface.
