This video explains how to read your electricity meter, which connects with satellites to tell Duke about your usage. Smart meters measure and record electricity usage at regular intervals, sending data to customers and the power company through radio waves, similar to home Wi-Fi. Customers can.

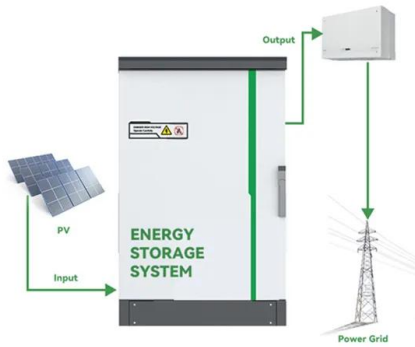

Read your meter power in and power out, compare it to your solar edge and your other meter. I suspect what you are missing is your self consumption during generation time. If your meter tap is after your main meter, the power company does not care or report that usage. Total usage = solar.

Understanding how to read a Duke Energy net meter is critical for customers who want to monitor their energy usage and make sure they are getting the most out of their energy consumption. Duke Energy's net meters measure electricity, both inbound and outbound, so customers can track their overall.
