

European Solar Energy Storage

How to start up a solar energy business

Overview

Of course, there's much more to solar installation than slapping up panels: there's general contracting, roofing, metal fabrication, sales, repair and maintenance, consultation, landscape design, and so much more. The best place to start a new solar business is between the cracks of large, over-saturated markets.

You've nailed down your niche, identified solar certifications and licenses, and are ready to make the jump. Let's take a dive into how to start a solar business from the ground up, starting with the legal stuff first.

There are many barriers when it comes to getting a solar business off the ground. Here are three common ones that can be easily solved with the right.

How to start a solar company?

This guide offers insight on how to start a solar company. Topics include market research, competitive analysis, sourcing solar panels, marketing, registering an EIN, obtaining business insurance, and more. Here's everything to know about starting a solar installation business. 1. Conduct Solar Company Market Research.

Should you start a solar business?

Starting a solar business doesn't necessarily mean you'll need a crew up on roofs installing panels. If sales is your thing, there are many businesses that focus on just that. These companies do all the work of selling solar systems: getting leads, qualifying them, doing in-home or virtual consultations, and getting the customer to sign.

How to start a solar business from the ground up?

Let's take a dive into how to start a solar business from the ground up, starting with the legal stuff first. An LLC, or limited liability company, is a business structure set up by state statute. LLCs provide several benefits, including liability protection, flexible structure, and tax advantages.

How much money do solar companies need to start a business?

In total, solar companies should model over \$225,000 in start-up capital to properly position for growth. Be ready to self-fund or pitch investors. Payroll Taxes & Benefits: These additive HR costs amount to 20-30% of base salaries, so add another \$45,000-\$67,500 to yearly payroll expenses.

Can a solar business become a profitable business?

Getting started with a new solar business is a very ambitious move that takes a lot of confidence to enact. However, turning it into a profitable business is quite the endeavor. If you think you have what it takes to be a successful solar panel company then think again.

Should you invest in a solar business plan?

Investing once in reliable equipment usually proves to be quite the lifesaver for many solar businesses. However, alongside reliable equipment, a business plan must include backups to account for any bit of equipment that does fail. Expertise when it comes to Solar Panels is a must-have.
