Using Buildcraft, Forestry, and Vanilla Minecraft, is there any way to store RF?

I've pondered ideas such as storing it in Forestry machines, but Wooden Kinesis Pipes can't pull energy from such machines. Also, I can't find a way to generate fuel, such as charcoal, without losing substantial.

Are there any good ways for energy storage?

Established mods have their energy cells like thermalstuff, but even the end tier fills up quite fast hooked up to something like a big reactor or similar. The goldstandard for me was the draconic blue ball of energy, but I want to find alternatives. I. What is the best way to store energy in modded MC?

The best methods in modded MC of storing energy have to be the gregtech AESU/IDSU or the Electricraft Auroral battery. Both are stupidly expensive. I was just playing modded minecraft and was wondering what the best way to store energy is, preferably something cheap to make but holds lots of power. What do you guys use?

What kind of power?

## Whats the best way to store Mj/EU/RF?

Funnier way to store MJ would be to search a nice little valley and use a floodgate to fill it with fuel. Perhaps you could build a little village in there first and have the church's bell tower loom over the fuel level.
