

European Solar Energy Storage

Is the alternative energy solar project legitimate

Overview

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency.

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency.

If your company offers solar energy, it is crucial to ensure that claims made by them are truthful and comply with established consumer protection laws. Scammers often offer more than they can deliver, such as claiming to be with the government or your utility.

Solar can be an excellent investment in renewable energy. Unfortunately, there are some scammers and illegitimate companies in the solar industry that mislead customers.

There are several types of green energy scams, including "free" solar panels and investment opportunities. Scammers may call you on the phone, knock on your front door, or connect over social media.

Be aware of solar energy scams - everything from scammers pretending to be affiliated with the government or utility company to businesses misrepresenting the cost of improvements, savings, and financing options. What is a solar energy scam?

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer's offer, it could cost you tens of thousands of dollars.

Are free solar panels a scam?

Know that “free” or “no cost” solar panel offers are scams. The federal government does not install solar systems in homes for free. If you’re considering whether solar energy is right for you, check out the Department of Energy’s guide for homeowners and learn more. Or check out the Department of Treasury’s guidance on clean energy.

What is a good alternative to rooftop solar?

CleanChoice Energy: If you want to support renewable energy without the complexities of solar panel installation, CleanChoice Energy offers an accessible alternative to rooftop solar. The company acts as an alternative energy supplier.

Should you choose a reputable solar energy company?

When temperatures rise, utility costs do, too. While reputable companies can help you save money with clean or solar energy improvements, scammers offer more than they can deliver.

Are solar scammers posing as government or utility workers?

Posing as a Government or Utility Representative Recently, California has seen an uptick in telemarketing calls from solar scammers posing as government or utility workers. The goal of these fake phone calls is to schedule a free energy audit of your home.

Does the federal government install solar systems in homes for free?

The federal government does not install solar systems in homes for free. If you’re considering whether solar energy is right for you, check out the Department of Energy’s guide for homeowners and learn more. Or check out the Department of Treasury’s guidance on clean energy. Take your time.
