

## European Solar Energy Storage

# Island energy Rwanda

## Overview

---

The extent of grid electricity is limited and mainly concentrated near Kigali. Most of the country uses as its main energy source. Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries. In addition, it is installing small solar units throughout the country to ensure that households located in off-grid areas have access to electricity, or to help deal with power outag.

What is the energy sector in Rwanda?

The energy sector in Rwanda is made up of three sub-sectors: power, hydrocarbon and new and renewable sources of energy. Amongst the renewable sources of energy are biomass, solar, peat, wind, geothermal and hydropower. Biomass is the most used and dominates both the demand and supply sides of the Rwandan economy.

How much electricity does Rwanda use?

The extent of grid electricity is limited and mainly concentrated near Kigali. Most of the country uses firewood as its main energy source. Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries.

What is Island energy?

Island Energy is pioneering clean, sustainable energy solutions for the energy transition era. Island Energy is Powering lives through our activities and by supporting an inclusive society. The supply of affordable, reliable and sustainable energy is crucial for addressing global challenges, including those related to poverty and inequality.

What is Rwanda's Energy use?

The country is in the midst of a rapid expansion of its electrical grid and many new plants are proposed or under construction. Biomass is the most important energy source utilized through firewood and agricultural waste for cooking. In 2014, this represented 85% of Rwanda's energy use.

Is biomass a source of electricity in Rwanda?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Rwanda: How much of the country’s electricity comes from nuclear power?

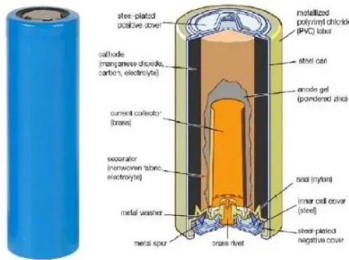

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Does Rwanda have a power grid?

Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries. In addition, it is installing small solar units throughout the country to ensure that households located in off-grid areas have access to electricity, or to help deal with power outages.
