100% Renewable Energy System Transition of Madeira Island

Evaluating this in the limited context of islands, this paper presents a multi-energy system transition to a 100% RE share in a two-folded technical analysis. The case study of Madeira Island using the EnergyPLAN modeling tool is used to show strengths

Portugal is now often called 'energy island'. Here's why

It also has a Multipurpose Terminal and a LNG (Liquefied Natural Gas Terminal) which has been in operation since 2003 and is handling over 60% of the natural gas consumed in Portugal. Perhaps you get the idea why Portugal is considered an 'energy island'. Renewables rich. Solar power panels are springing up everywhere as are wind generators.

Business

We work very closely with the local community, landowners, and all the relevant statutory bodies to obtain a successful outcome for our renewable energy projects. The group operates in ...
