

European Solar Energy Storage

Isle of Man rooftop wind power

Overview

Does the Isle of Man have onshore wind?

The Isle of Man has one of the best onshore wind resources in Europe both in terms of availability and wind speed. In January 2023, the Council of Ministers supported Manx Utilities' proposals to progress actions to deliver onshore renewable generation via onshore wind.

Could a windfarm power the Isle of Man?

The Earystane location is one of the best sites in the Isle of Man in terms of generating electricity from wind with anticipated wind speeds in excess of 10m/s. This would mean that a windfarm at the site could potentially deliver more than one quarter of the Island's annual demand.

Should the Isle of Man commit to a 20MW onshore windfarm?

It also recommended that the Isle of Man Government should commit to a 20MW onshore windfarm to meet its 2026 Target with smaller scale solar projects delivered through a Framework Approach across public buildings. Bird & Bird highlighted that it would be necessary to utilise the onshore wind sites already identified to meet the 2026 Target.

Will Manx Utilities deliver onshore renewable generation via onshore wind?

In January 2023, the Council of Ministers supported Manx Utilities' proposals to progress actions to deliver onshore renewable generation via onshore wind. These objectives are also outlined in the Isle of Man Government Island Plan, Energy Strategy, and support the requirements of the Climate Plan 2022-2027.

How fast should a windfarm be on the Isle of Man?

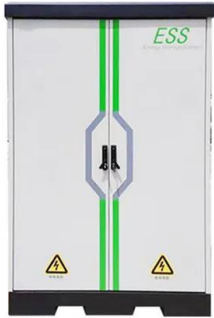

Wind speeds must be >6 m/s to ensure the windfarm is commercially viable. Typically on the Isle of Man these are all upland areas. Wind turbines must be located a minimum of 500m from the nearest property in line with Technical

Advice Note 8 (TAN 8) (England & Wales) to mitigate noise impact.

Is the Isle of Man a good choice for electricity?

Based on an Island wide audit and feasibility assessments undertaken by specialist consultants Wardell Armstrong, this site appears to offer the best value to the electricity consumers of the Isle of Man with the lowest environmental impact when compared to the other option sites.

Isle of Man rooftop wind power

'Huge support' for wind power on Island, despite sea route ...

MHK urges public to share views during statutory consultation on wind proposals An MHK believes there's a huge amount of support on the Isle of Man for offshore wind power, despite concerns over

Why Elephant and Castle's iconic Strata tower wind turbines ...

Southwark locals have lifted the lid on why the wind turbines on an iconic 'green' building in South London never seem to be spinning. It comes after renewed debate and confusion from Londoners who regularly pass the Strata SE1 tower in Elephant and Castle - and haven't once seen the wind turbines on top in operation.
