

## European Solar Energy Storage

# Isle of Man solar panel exports

## Overview

---

- Exports to both GB and Republic of Ireland from wind and solar on island likely to be limited. • UK and ROI are already constructing a large amount of intermittent renewables at much larger scale. • If the Isle of Man gains access to GB's CFD market then there may be opportunity to export.
- Exports to both GB and Republic of Ireland from wind and solar on island likely to be limited. • UK and ROI are already constructing a large amount of intermittent renewables at much larger scale. • If the Isle of Man gains access to GB's CFD market then there may be opportunity to export.

Manx Solar Electrical Ltd is a business dedicated to helping the Island reduce its carbon footprint through renewable energy solutions. From solar panels to heat pumps and battery storage, Manx Solar Electrical is driving innovation in renewable technology.

Manx Solar Electrical focus on the highest quality products and components available in the industry today, such as Solar Edge, JA Solar, Stiebel Eltron, Mitsubishi, Dimplex and Tesla Powerwall which have a superb reputation in Europe. Many products are even specifically adapted to the climate and conditions in the British Isles.

Manx Utilities will own the public solar generators, with Government Departments benefiting from lease payments for supporting the installations. Solar panels will be fitted to publicly owned buildings and carparks which has been determined to have the lowest environmental impact.

If you want to be paid for this surplus you need to make sure you're getting an export payment. More details can be found on the MUA website. Below you can see some of our installations in the Isle of Man. Who are Manx solar electrical?

You might be surprised! © 2019 Manx Solar Eletrical Ltd. Registered in the Isle of Man No. 127 689C. VAT Registration No. 004 6877 73 The Isle of Man's leading renewable energy provider, Solar PV, Heat Pumps, EV Charging, Tesla Powerwall, Solar Edge, Stiebel Eltron, Dimplex, Mitsubishi, JA Solar.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

How many solar sites will Manx Utilities have?

Working with the Department of Infrastructure, Manx Utilities has identified over 30 sites suitable to deliver a total of 30 Megawatts of solar power on the public estate. The first phase of solar installations will see five projects being progressed with more sites to be identified to reach the 10 Megawatt objective.

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor?

Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

Will the Isle of Man be short of baseload power?

Both UK and ROI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor?

Neither option is without challenge, but likely provide the greatest potential for export.

### Solar Farm Plan Submitted - Gef - Isle of Man

'The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030.' The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

### 2 Solar Panel Installation in Isle Of Man , Checktrade

What's more, solar panels have a range of other benefits too. These include: Versatility - Solar panels can be fitted onto most flat surfaces, from property roofs to countryside fields. Reliability - Even on cloudy days, solar panels can generate electricity. Although they do generate more during sunny days.

#### ESS

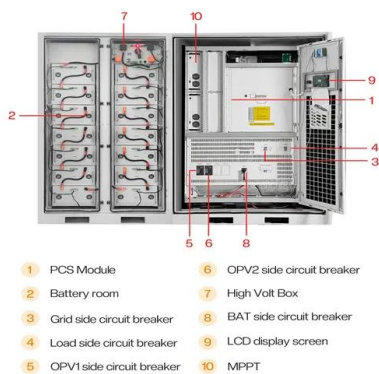

### The complete guide to solar panels on the Isle of Wight

How much do solar panels cost on the Isle of Wight? Solar panels on the Isle of Wight cost £705 per 350-watt (W) solar panel, on average. A system with 10 of these panels - which adds up to the 3.5 kWp (kilowatt peak) we recommend for the average three-bedroom house - will therefore cost £7,050.

## Cubico JV introduces plans for Isle of Man solar farm

Proposals for the very first utility-scale solar farm on the Isle of Man have been released by designer Peel Cubico Renewables (PCR). The 26MW Billown Solar Farm in Malew, near Castletown, would certainly produce enough power to fulfill more than 5% of the Isle of Man's power demand, when functional in 2024.
