

European Solar Energy Storage

Italian energy storage power supply purchase

Overview

The country's energy storage sector has become Europe's dark horse, with power supply purchases jumping 38% in Q1 2024 alone [7]. Why?

Three words: sunshine, policy incentives, and grid headaches. Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

Is there a need for energy storage solutions in Italy?

Local industry contacts, as well as U.S. sector firms, have also indicated to Post that there is a need for energy storage solutions in Italy.

How will Italy develop utility-scale electricity storage facilities?

To develop utility-scale electricity storage facilities, the Italian Government set up a scheme that was approved by the European Commission at the end of 2023. Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years.

How will Italy invest in electricity storage?

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through tenders published by Terna, the

manager of Italy's high voltage grid. The next tender will be released in 2024.

How many storage systems are there in Italy?

More in detail, 311,189 storage systems were present in Italy in mid- 2023, with a total power of 2,329 MW and a maximum capacity of 3,946 MWh. Terna (the high voltage grid operator) also holds systems totaling 60 MW in power and 250 MWh in capacity.

Italian energy storage power supply purchase

'Italy is Europe's most interesting battery market'

Analyst Aurora Energy Research tells pv magazine 3 GW of battery energy storage systems (BESS) are at an advanced stage in Italy and expected online within three years.

Italy Adopts a New Energy Decree to Boost Energy

The electricity supplied will have to be paid back by the companies over a period of 20 years. b) Measures to strengthen the security of natural gas supply and its flexibility ...
