Striking GOLD with NCZ; how to go carbon neutral

Known for slashing the carbon emissions of its customer's buildings, Kendra's got a reputation for boosting energy efficiency. But with this status comes an expectation to lead by example, especially when it comes to hitting net zero targets.

Careers

Help us continue to provide innovative solutions for our customers by applying for one of the exciting opportunities in our services, technology & engineering and manufacturing teams. Kenera recognises that managing talent is vital to achieving continued growth and meeting the changing demands of the energy market.

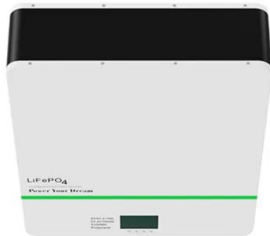

Senior Management Team

BMSi grew rapidly over the following 10 years, winning many prestigious industry awards, and were ultimately sold to Centrica in 2008, who saw them as the perfect platform to enter the Building Energy Management System market. In 2011 Gary was back in the BEMS industry with the acquisition of Kendra Energy Solutions.

Products and Services

Creating efficiencies through technology and engineering applications for oil & gas, emissions reduction, green fuel and clean energy Designing

and manufacturing state-of-the-art energy infrastructure and components for the hydrocarbons and renewables markets

Building a better planet: how BEMS engineers make a

Integrating renewable energy sources. Needless to say, renewable energy is where we're headed - and from a technical standpoint, BEMS engineers will play a key role in bringing this about. By integrating renewable energy sources into the BEMS (e.g. solar and wind turbines), engineers will reduce dependency on traditional, less sustainable

About Kenera

Whether it's providing trained technicians to support services and maintenance, fit-for-market engineering solutions for on and offshore energy facilities, or component manufacturing for renewables and hydrocarbons, we have the expertise and experience to meet your needs.

Seven things you need to know about our BEMS

Because buildings consume 40% of the world's energy and produce a third of greenhouse gas emissions. And the BEMS industry confronts this issue head on. We drastically reduce the carbon footprint of buildings. Equipped with cutting edge technology and building automation knowhow, we boost energy efficiency - making buildings smarter and

Meet Raymond: the man behind Kendra's growth in ...

Meet the man behind our growth in Scotland - Raymond. In this Q&A, he reveals details of his 40-year BEMS career, starting in 1984, and what he thinks of Kendra

About Kenera

We are committed to playing an active role in the energy transition, investing in and delivering solutions through digitalisation, emissions control and clean fuel technologies. Kenera drives collaboration between our services, engineering, design, technology and manufacturing teams and stimulates focused investment in innovation and key

PROActiv Projects

PROActiv Projects is an umbrella term for all our tailored BEMS packages. It covers large and small projects across any industry type. And because our solutions are fully comprehensive (they cover every eventuality), they'll fulfil all your energy management needs, including:

Manufacturing

Our benCON converter solutions are used for power conversion in new energy markets such as solar, battery and electrolysis applications. Our rig technologies supported a customer with over 100 wells to achieve 8% more bit on bottom time over 48 months.

KENERA ENERGY SOLUTIONS LIMITED

The perks of being a BEMS engineer

Crucially, though, BEMS engineers are helping to tackle one of the biggest challenges of our time - the climate crisis. Right now, the built environment accounts for a third of the earth's energy consumption. By increasing energy

efficiency in buildings, BEMS engineers are drastically reducing our carbon footprint.

Technology and Engineering

We are creating efficiencies through technology and engineering to develop applications for oil & gas, emissions reduction, green fuel and clean energy. Our multi-disciplinary technology & engineering division seamlessly integrates into ...
