## ~uninsulated DIY battery box concept? , DIY Solar Power Forum

I have a shed to put my solar system in. It's an insulated telecommunications shelter, fiberglass over foam so the shed is insulated and shuts pretty tight. I guess the benefit of three separate battery boxes is that a fire would only take out 1/3 of the battery bank but the idea of LiFePo4 batteries is to not have fires and have enough

## Battery Box insulation

Re: Battery Box insulation tony's point of at least one pv vertical or nearly so is a good one and will keep something going to the batteries during those times of heavy snowfall. just be sure the ground accumulations won't sneak up and start covering the bottom edge of the pv. as to your batteries, if you feel these 1 year old batteries are still in great shape, then by all means add to ...

## Is there anyway to SAFELY heat a battery box?

I'll be building a well insulated/ventilated box to house the batteries but I was wondering if anyone has suggestions on how to safely heat the box. (these will be running in the middle of a forest and somewhat isolated) Eg i'm aware of the battery gassing problem, so some sort of passive or indirect heating capability would be ideal.
