

European Solar Energy Storage

Krc energy Azerbaijan

Overview

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

What regulatory regimes apply to oil & gas production in Azerbaijan?

Two basic regulatory regimes apply to oil and gas exploration and production in Azerbaijan: the system established under the Law on Energy and implemented through energy contracts, and regimes particular to each case established by specific production sharing agreements (PSAs).

Does Azerbaijan have an independent energy regulator?

Azerbaijan does not have an independent energy regulator. In 2017, the President of Azerbaijan signed a decree to establish an Energy Regulatory Agency under the Ministry of Energy. The Ministry of Economy regulates licensing procedures, while tariffs are set by the Tariff (Price) Council, chaired by the Minister of Economy.

What is the power generation capacity of Azerbaijan?

The total power generation capacity of Azerbaijan is 8320.8 MW, the capacity of the power plants on renewable energy sources, including large HPPs is 1687.8 MW, which is 20.3 % of the total capacity.

How much energy does Azerbaijan need?

Azerbaijan's energy demand (measured as total energy supply [TES]) was 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in 2022).

What is Azerbaijan's energy policy?

The 2004 State Programme on the Development of the Fuel-Energy Complex for 2005 to 2015, designed to support oil and gas developments and to ensure energy supply security, set out Azerbaijan's main energy policy.

[Azerbaijan: Energy Country Profile](#)

Azerbaijan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

[Renewable energy in Azerbaijan](#)

Azerbaijan is one of those countries where windmills could be perfect fit due to geographical location. In particular, the Absheron peninsula, coastline of Caspian Sea and islands in the northwestern part of Caspian Sea, the Ganja-Dashkesan zone in the west of Azerbaijan and the Sharur-Julfa area of the Nakhchivan

Autonomous Republic are favorable areas.

Explainer: COP29 host Azerbaijan's developing energy industry

Sadikhov is optimistic about Azerbaijan's energy progress. "The Caucasus has recently become important for global logistics and trade routes due to the situations in Russia and Iran. We have signed a 10GW pipeline with Azerbaijan, which we plan to implement by 2040, that will provide opportunity for domestic consumption and enable green

Baku's Balancing Act: Azerbaijan Between Green Energy and Oil ...

Azerbaijan's economy has long been centered on its hydrocarbon sector. The world's first industrial oil well was drilled in 1847 at Bibi-Heybat on the outskirts of Baku; by the turn of the twentieth century, Azerbaijan was producing over half of the world's oil the Soviet period, Baku continued to be a major supplier of oil--though production declined in later years.
