

## European Solar Energy Storage

# Latvia axir energy equip

## Overview

---

Is Latvia interested in wood biomass?

Over half of Latvia is covered by forest, so wood biomass presents excellent potential for further development. In addition to renewable energy projects, Latvia remains interested in pursuing a possible liquefied natural gas (LNG) terminal to enhance its energy supply source diversity.

How can Latvia reduce its reliance on foreign sources of energy?

The Latvian government is interested in diversifying supplies and in developing more local resources to reduce the country's reliance on foreign sources of energy. To reach these targets, government agencies and entrepreneurs have discussed options to move beyond hydropower into wind and biomass power plants.

What is the EU's energy policy for Latvia?

The current EU policy dictates that Latvia must increase the share of renewable energy in its final energy consumption and Latvia has plans to reach 50 percent by 2030 according to the EU's National Energy and Climate Action Plan 2030. Much of Latvia's heat and electricity still comes from imported natural gas.

Is there a wind park in Latvia?

Many stretches of the Baltic coast have wind conditions suitable for wind parks, especially offshore. Over half of Latvia is covered by forest, so wood biomass presents excellent potential for further development.

## Latvia axir energy equip

### A Solution to Global Warming, Air Pollution, and Energy ...

Reduces 2050 all-purpose, end-use energy requirements by 59.9%; Reduces Latvia's 2050 annual energy costs by 66.2% (from \$7.1 to \$2.4 bil./y); Reduces annual energy, health, plus climate costs by 90.1% (from \$24 to \$2.4 bil./y); Costs ~\$21 billion upfront. Upfront costs are paid back through energy sales. Costs are

### Axis Technologies to build Latvia's largest biomass plant
