Lead-acid battery pump

Overview

What are the different types of lead acid batteries?

Two types of lead acid batteries are available. Most people are familiar with the standard lead-acid vehicle battery used in a car. These batteries are designed to provide a large amount of current for a short period of time. The output and capacity of these batteries are rated in cold cranking amps (CCA).

Can You water a lead acid battery?

Water your batteries safely in seconds. Flooded lead acid battery maintenance, particularly battery watering, can be time-consuming, messy and, in some instances, even unsafe. As the leading manufacturer of deep-cycle batteries, we understand the importance of battery maintenance and its impact on the life of your deep-cycle battery.

What kind of battery does a backup pump use?

The typical backup pump system has a 12-volt direct current (DC) motor powered by a battery connected to a specially designed trickle charger. A regular battery charger will not work for this type of installation except in an emergency. Two types of lead acid batteries are available.

What is the best battery for a sump pump?

2. AGM Batteries AGM stands for Absorbed Glass Mat and is a technologically superior battery, perfect for backup sump pump systems.

What is a backup battery for a sump pump?

When you're shopping for a backup battery for your sump pump, you'll notice terms being used like "deep-cycle," "maintenance-free," "marine," and "solar." But since they're used interchangeably to describe standby lead-acid batteries, buying the right one can be confusing.

Can a car battery run down a sump pump?

If the primary battery runs down in an emergency, a standard vehicle battery can be used to provide power to the backup sump pump. Check every six months to ensure that the battery maintains an adequate charge and has no corrosion. Previous [How to Waterproof Your Basement](#).

Lead-acid battery pump

Sump Pump Battery Back Ups: Lead-Acid, Deep-Cycle Battery

Almost any sump pump can run off a 12-volt battery if needed, but there are better options that ensure the job gets done. Our experts recommend a lead-acid, deep-cycle battery for most sump pump battery backups offered, rated to at least 75 amp-hours.

Trojan Battery , HydroLink(TM) Watering System

Using Trojan's HydroLink single-point battery watering system, you can get the maximum performance and long life you need from your flooded lead acid batteries, while eliminating the risk of potential overflow or acid splash caused ...

NPP NPD12V 80Ah(2 Pcs 12V 80Ah Group 24 AGM Deep Cycle Sealed Lead Acid

NPP group is the pioneer which manufactures a full range of renewable energy products, which including VRLA Battery, Deep Cycle Battery, GEL Battery and Lithium Battery for back up, emergency system, solar system and so on.

Briidea 1500W Sump Pump Battery Backup System, Auto Switches to Battery

In the event of a power outage, it automatically switches to battery power, ensuring your sewage pump system operates steadily. It can easily handle extreme weather like hurricanes or heavy rain, keeping your basement as dry as ever

Trojan Battery , HydroLink(TM) Watering System

Using Trojan's HydroLink single-point battery watering system, you can get the maximum performance and long life you need from your flooded lead acid batteries, while eliminating the risk of potential overflow or acid splash caused by overfilling.

NPP NPD12-80Ah (2 Pcs) 12V 80Ah Group 24 AGM Deep Cycle Sealed Lead

To achieve optimum performance and long lasting, never discharge battery over 50% of it's full capacity. Avoid discharge your battery more than 80% as this will greatly damage the battery's internal components.

75 AMP Battery

A reliable, long lasting power reserve perfect for any battery backup system, the Richtech battery features sealed lead acid construction, making it completely maintenance-free and eliminates the need to handle acid.

Sump Pump Battery Buyer's Guide

But since they're used interchangeably to describe standby lead-acid batteries, buying the right one can be confusing. Now, we'll decode the battery nomenclature that will help you differentiate one battery from the next, so you can find the perfect type of battery for your sump pump.
