 Bigtruckin85 said: Another option I looked at was
 the Victron 150/35. Using the Victron calculator if
 I only went 1S5P, I'd stay within the VOC and
 current limit.

MidNite Solar Inc.

Simply install the MidNite Solar classic application from the included DVD or our web site and connect the Lite controller to the network via the Ethernet port. The FREE MidNite Solar Local Application enables you to monitor your Classics over your local network or the Internet. As with the whole Classic Line, they have MidNite's exclusive HyperVOC which extends VOC limits when needed. With all the Classics, you receive reliability, functionality and an incredibly powerful MPPT charge controller!

MIDNITE THE ONE Inverter NEW , DIY Solar Power Forum

PV DC negatives seem to be common internally. Other AIO's such as Sol-Ark etc. need to have the PV negatives 100% isolated. I'm sure Midnite would still recommend keeping negatives isolated, but it is just something I found interesting. According to the spec sheet, it appears that Midnite would not call this unit transformerless!
