Lg energy storage battery recall

Overview

This recall involves LG Energy Solution Model RESU 10H lithium-ion storage batteries that were installed as part of a residential energy solar panel system. The recalled batteries allow owners to capture and store energy from the solar panels. Are LG Energy Storage batteries recalled?

A: In cooperation with the U.S. Consumer Product Safety Commission ("CPSC") and other global product safety authorities, LG Energy Solution ("LGES") announced a recall of certain home energy storage batteries. The home batteries can overheat in rare circumstances, posing a risk of fire and emission of harmful smoke.

Are LG solar ESS batteries affected by a recall?

Certain LG large lithium-ion batteries are affected by the recall—particularly LG solar ESS batteries manufactured from January 2016 onwards. Around 6,400 batteries are yet to be diagnosed or replaced. These batteries are installed in homes mainly to capture and store renewable energy from solar panels.

What is a recalled LG Energy Solution model Resu 10h battery?

This recall involves LG Energy Solution Model RESU 10H lithium-ion storage batteries that were installed as part of a residential energy solar panel system. The recalled batteries allow owners to capture and store energy from the solar panels. The batteries are wall mounted and measure about 29 by 36 by 8 inches. They weigh roughly 220 pounds.

How do I know if my LG ESS home batteries are faulty?

LG ESS Home Batteries are installed as part of a residential energy solar system which allows owners to capture and store energy from solar panels. You should urgently check your home batteries serial number via our Serial Number Checker to know whether your product is affected.

What should I do if my LG battery is recalled?

If you have an LG battery affected by this recall – even if it already has the diagnostic software installed, switch off your battery immediately and contact LG Energy Solution. Keep your battery switched off until further notice from LG Energy Solution.

What happens if a LG ESS home battery overheats?

Affected Battery may overheat and catch on fire, which can result severe property damage or serious injuries. LG ESS Home Batteries are installed as part of a residential energy solar system which allows owners to capture and store energy from solar panels.
