

European Solar Energy Storage

Lithuania affordable solar system inia

Overview

Why should Lithuania invest in solar energy?

To be an active partner of society, politicians and business, creating a suitable and sustainable environment for the development of solar energy in Lithuania. We unite solar energy market players to inspire, encourage and help Lithuania to use solar energy as a clean, renewable source of energy, ensuring energy independence and a secure future.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Can you sell solar power in Lithuania?

Residential PV system owners in Lithuania are entitled to sell excess power to the grid under net metering. According to the International Renewable Energy Agency, the Baltic nation had 148 MW of installed solar power at the end of 2020. It is heavily dependent on energy imports.

What is a solar industry association?

, the premier association for the European solar PV sector, shapes regulations and business landscapes for solar's growth. is to consolidate Lithuanian companies and research institutions operating in the photovoltaic technology sector in order to increase the sustainability and competitiveness of the national photovoltaic sector.
