Madagascar cola solar

Overview

Is Colas Madagascar sustainable?

Colas Madagascar has operated on the “Red Island” for almost seventy years. Today, as the country faces the combined challenges of climate change and economic growth, Colas is playing an ever more active role in the country’s sustainable development.

What does Colas Madagascar do?

A genuine social player, Colas Madagascar regularly contributes to local programs and initiatives, including the Lemurs’ Park environmental education program. Since 1950, around 45% of the island’s natural forests have disappeared. “We are helping raise awareness about the crucial issue of deforestation.

What is Colas Madagascar doing in 2021?

In 2021, supported by Colas Projects, Colas Madagascar won a contract, divided into two sections, to upgrade 232 kilometers of road between Ambanja and Diego-Suarez. Since the start of 2022, Colas has been setting up along the Route 6 project and teams have been getting into position in the base camps, workshops, plants and quarries.

Does Colas Madagascar know the road?

He knows the road well: since joining Colas in 1989, he has helped upgrade five different sections. In 2021, supported by Colas Projects, Colas Madagascar won a contract, divided into two sections, to upgrade 232 kilometers of road between Ambanja and Diego-Suarez.

What makes Colas Madagascar a great business district?

Cranes mark the skyline above the business district, which didn’t even exist before the year 2000. Colas Madagascar built the highest tower, with its 30 floors, home to the head office of several major international companies. And

the Colas subsidiary's role in developing the district does not stop there.

Does Madagascar have a solar system?

The system is expected to reduce CO₂ emissions by 90 metric tons per year. With 2,800 hours of sunshine per year, Madagascar is ideal for tapping into solar energy. Solar panels are appearing all over the country, where the demand for energy is constantly increasing.
