As more and more HVAC professionals become familiar with solar water heating, many recognize opportunities to extend solar thermal technology for combined domestic hot water and space heating applications. This is a trend our parent Caleffi SpA identified several years ago in

Europe, and is now a topic of growing interest here in North America.

Thermostatic mixing valve for solar thermal systems

The thermostatic mixing valve is used in solar thermal systems that produce hot water for domestic purposes. It is designed to maintain the preset temperature of the mixed water delivered to the user outlet, when there are variations in the temperature and pressure of the hot and cold water at the inlet, or in the drawn-off flow rate.
