Why Renewables and Storage? -- Peregrine Energy

The share of renewable energy in the power sector is expected to reach 85% by 2050 with 8 states mandating over 7 GW of battery storage and the expectation that more will require batteries as part of their Renewable Portfolio Standard (RPS). Independent System Operator (ISO) queues are currently overloaded and storage has the optionality to streamline development hurdles in ...

Peregrine Battery Storage Facility

Battery storage adds greater reliability and resiliency to the electrical grid. During times of peak energy generation, such as when power

from solar or wind is in abundance, batteries can be charged to capture excess generation. Batteries can then discharge this stored generation into the grid during times of peak energy demand.
