Overview

Is solar PV a viable source of RES-E in Malta?

Solar PV is the most viable source of RES-E in Malta. It is projected to contribute to 42% of Malta's RES contribution in 2030. However, also other renewable energy sources are supported in the country through tenders. Malta's target for the RES- E sector is 11% by 2030 (NECP, pg. 40-41).

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

Is offshore wind energy a viable renewable technology option in Malta?

In the Maltese NECP, neither onshore nor offshore wind energy are included as a viable renewable technology option contributing to Malta's renewable energy objectives for the EU's 2030 target (NECP, 2019). 1. Site selection process.

Does Malta support solar water heaters?

Malta supports an installation of solar water heaters through a subsidy scheme. The RES-T share is expected to be predominantly met by an increase in biofuel consumption. An increase in the share of electric vehicles in the road transport vehicle fleet in Malta is also projected. The share of RES-T is expected to reach 15% by 2030. (NECP, pg. 42).

Who is eligible for energy subsidies in Malta?

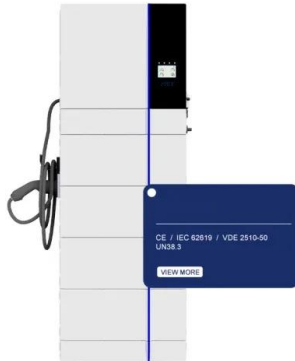

Eligible are new photovoltaic installations and new wind energy installations, which have not benefitted from other support. Tenders for small installations - Malta has a premium tariff, which is awarded through a tender held by the

Ministry for Energy and Water Management.

What is the share of renewable heating and cooling in Malta?

The share of renewable heating and cooling is expected to reach 22.06% by 2020 and rising to 25.71% by 2030 (NECP). Malta supports an installation of solar water heaters through a subsidy scheme. The RES-T share is expected to be predominantly met by an increase in biofuel consumption.
