

## European Solar Energy Storage

# Mexico power system solution

## Overview

---

What opportunities are there in Mexico's electrical power industry?

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable energy projects, and distribution networks. The U.S. Commercial Service Mexico is ready to assist you in exploring these opportunities in Mexico.

What is the national power system in Mexico?

Mexico's National Power System (Sistema Eléctrico Nacional or SEN) is one of the largest in the Western Hemisphere. It is comprised of nine regions, plus a binational electricity system in Baja California. Most of the nine regions are interconnected, forming the National Interconnected System (Sistema Interconectado Nacional or SIN).

Is Mexico on the brink of a major energy reform?

Mexico is on the brink of a major energy reform that will significantly affect how people produce and consume electricity in the country. In 2014, a package of energy reform legislation became law that established a new legal framework for Mexico's energy industry.

How much solar power does Mexico need in 2024?

To meet the 35% clean energy target in 2024, Mexico needs at least 128.83 TWh or 42.56 TWh of additional clean energy generation. National solar PV capacity potential is estimated at 24,918 GW.<sup>1</sup> This potential capacity could generate 50,196 TWh/yr or 137 times the 365 TWh estimated demand for Mexico in 2024.

What is the future of power generation equipment in Mexico?

The market for power generation equipment in Mexico is estimated to increase 1.05 percent from 2022-2023, while exports from the United States

to Mexico are expected to increase 0.93 percent.

How much wind power will Mexico generate in 2024?

National wind capacity potential is estimated at 3,669 GW<sup>1</sup>. This potential capacity could generate 5,759 TWh/yr or 15 times the 365TWh estimated demand for Mexico in 2024. NREL Renewable Energy Data Explorer.
