

European Solar Energy Storage

Mobile solar station EPC service price in Belgium

Overview

How many MWp of solar panels are installed in Belgium?

When we installed the first photovoltaic energy systems, we were pioneers. Today, like solar energy itself, we are an established player. Over the years we have already installed more than 500 MWp of panels, both in Belgium and abroad. In addition, we are responsible for the maintenance of 300 MWp on more than 250 sites in Belgium.

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption :.

Why should you install solar panels in Belgium?

Installing solar panels in Belgium has a number of advantages: Silver side: You pay less for electricity: Your electricity bill is going down. You become more independent : With the right installation, you can produce almost all the electricity you need. You can sell the electricity you don't use.
