

## European Solar Energy Storage

# Mobile solar unit quotation in Netherlands 2030

## Overview

---

Will the Netherlands increase its solar capacity in 2030?

The Netherlands plans to increase its installed solar capacity to 25.7GW in 2030. Image: Alternus Energy. The Netherlands is one of Europe's major solar markets, according to trade body SolarPower Europe's report European Market Outlook for Solar Power 2023-2027.

Is the Netherlands a good place to integrate solar PV modules?

The Netherlands holds a unique position in the integration of PV modules in the built environment. Through desk research and interviews with industry experts we address relevant market failures that affect the European solar PV supply chain and provide strategic perspectives for rebuilding it.

What are the future prospects for solar PV in the Netherlands?

Cederik Engel, Managing Director of CCE The Netherlands and Head of ESG at CCE Holding, sees strong prospects ahead. The Netherlands leads the EU in per-capita solar PV capacity, having added around three gigawatts annually over the past three years.

What is the market outlook for solar power in the Netherlands?

According to the Global Market Outlook for Solar Power report, the market in the Netherlands is developing strongly, with an addition of 3.9 GW of solar PV capacity in 2022 and a project programme already approved for 11 GW.

What happened to solar installation in the Netherlands in 2023?

In 2023 the steady growth of solar installation in the Netherlands levelled off with 4,343 GWp installed capacity and no longer showed the accelerated growth pace of the last few years.

How much solar will the Netherlands have by 2040?

In its updated national energy and climate plans (NECP), the Netherlands' planned solar capacity is expected to reach 25.7GW by 2030, down from 27GW in the previous NECP, and the only EU country to revise down its solar target. By 2040, the country expects to have an installed solar capacity of 42.6GW.
