

## European Solar Energy Storage

# Montserrat harness energy

## Overview

---

Who is our partner in Montserrat?

Our lead partner in Montserrat is the Energy unit within the Ministry of Communications, Works, Energy and Labour (MCWEL).

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

Can wind energy be implemented in Montserrat?

Although wind energy has not yet been fully re-explored in Montserrat, a desktop study using RE-SAT wind resource maps was conducted to determine suitable locations for the implementation of wind energy. The outcome of this study was included in their first Environmental Statistics Compendium<sup>6</sup> in Montserrat, which was published in 2020.

How much does electricity cost in Montserrat?

Montserrat's utility rates start at \$0.53 per kilowatt-hour (kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many island nations, Montserrat is almost entirely dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

What is Montserrat energy policy 2016-2030?

(Montserrat Energy Policy 2016-2030). • In-country commitment is vital for the success of partnership projects: The lead partner in Montserrat, the Energy Unit at the Ministry for Communications, Work, Energy and Labour (MCWEL), facilitated the engagement with other organisations.

What are the challenges faced by Montserrat's re-sat project?

In-country challenges: • Timing and relevance are important for co-production: The RE-SAT project was well received by Montserrat due to their ambitions to transition to renewables as they saw an immediate opportunity to exploit the platform to their advantage. (Montserrat Energy Policy 2016-2030).
