

## European Solar Energy Storage

# Morocco esm 48150b1

## Overview

---

How long should an ESM be stored?

It is recommended that the ESM not be stored for a long period. It should be used soon after being deployed onsite.  $30^{\circ}\text{C} < T \leq 8$  months soon as possible. recharge: Recharge the ESM. warranty period. 1. If ESMs have been stored overdue, promptly report the event to the department leader. 2.

Can ESM be replaced safely and reliably?

ESM can be replaced safely and reliably. the MANUAL ON/OFF button. The ESM provides backup power for a power system. It can be used alone or used with lead-acid batteries to back up power. communications port that supports both the CAN and RS485 protocol. DO2 output contact is closed, an alarm is reported by default).

What is the recommended cable size for ESM?

terminal recommended cable size is 25 mm<sup>2</sup>. If the ESM is can be smaller but should be at least 16 mm<sup>2</sup>. with the Modbus protocol. ● Baud rate: 9600 bit/s. parallel. temperature protection, power module internal default.) energized). Off: The ESM is in sleep mode or shutdown. data. interrupted.

How do I Activate my ESM battery?

Hold down the MANUAL ON/OFF button for at least 5s and less than 15s. Wait all indicators on the front panel turn off and then remove the cables. Place the ESM in the original packing case. Modify the latest charge time and the next recharge time marked on the original packing case. ● Batteries can be activated through power cables.

Can ESM be charged or discharged?

ESM cannot be charged or discharged. Long-time frequent short circuiting can result in cell or board faults, which may cause risks such as fire. value, configurable in the range of 1 minute to 720 hours). Otherwise, the ESM will

be internally locked, which may affect the ESM power backup.

How to install ESM activation cables?

Perform the following steps to install the activation cables. 1. Locate the ESM activation cable and cable terminals in the fitting bag. 2. Install the activation cable at the terminals. 3. Install one end of the activation cable at a PWR port of the ESM. 4. Install the other end of the activation cable at a load route (BLVD route power system).
