

## European Solar Energy Storage

# Morocco harka energy dmcc

## Overview

---

What is a Moroccan NDC?

The Moroccan NDC covers all sectors of the economy and relies heavily on energy sector transformation away from oil and coal and towards renewable energy sources and energy efficiency improvements in demand sectors.

How much investment is needed to implement Morocco's NDC?

The implementation of Morocco's NDC requires substantial investment in the energy sector, with an estimated USD 18–30 billion over 2020–2030 needed to reach its NDC targets.

How can Morocco achieve a net-zero economy?

To achieve a transition towards a net-zero economy in Morocco, a rapid phase out of fossil fuels should be conducted in all energy sectors, both in energy supply and energy demand (e.g. transport, industry, buildings).

Does Morocco need a new energy policy?

The analysis shows that current policies in Morocco need significant strengthening to meet the targets outlined in its Nationally Determined Contribution for 2030, based on the elimination of coal-fired power plants and the uptake of renewable energy technologies, in particular wind and solar power.

How does the Moroccan energy system work?

The Moroccan energy system in BAU develops in line with the continuation of already legislated energy and climate policies, current trends, existing plans, and cost improvements in low-carbon technologies [ 22 ], while no emission reduction targets are imposed.

Does Morocco have a coal power plant?

In December 2018, Morocco commissioned the 1.4 GW Safi ultra-supercritical coal power plant, which can supply around 25% of Morocco's electricity [ 10 ], while there are plans for new coal-fired plants [ 11 ].
