

## European Solar Energy Storage

# Mox outdoor energy storage

## Overview

---

How much money does Moxion Power have?

Total funding so far: \$110 million. California-based startup Moxion Power is building high-powered, mobile energy storage technology that can be used pretty much anywhere.

What is Moxion Power?

While big legacy companies like Generac and Caterpillar are beginning to offer small battery-powered units in addition to their larger diesel generator lines, California-based startup Moxion Power is focused entirely on this new power frontier. It is building high-powered, mobile energy storage technology that can be used pretty much anywhere.

What does Moxion do?

Power to the people. Good to go. See what all the talk is about. Moxion is pioneering mobile energy storage to change the way we move energy through our environment.

Do outdoor energy storage systems need a lot of maintenance?

**Low Maintenance Requirements:** Outdoor energy storage solutions require low maintenance to ensure their longevity and performance. Cloudenergy's energy storage systems are engineered with this in mind, featuring advanced technology and durable construction that minimize the need for frequent maintenance.

How much energy does a Moxion MP-75/600 use?

Other mobile BESS are built into standard shipping containers for easy transport. Mobile storage systems range in capacity from 200 kilowatt-hours (kWh) to over 1,000kWh. To put those figures into perspective, there is enough energy in the 530kWh Moxion MP-75/600 to power a Tesla Model 3 for over 2,200 miles.

Who makes Moxion battery modules?

“We design, engineer and manufacture all of the core technologies that we use. So we’re not buying someone else’s battery module. We are actually manufacturing battery modules in house,” said Paul Huelskamp, CEO of Moxion. Huelskamp says diesel generators are notoriously difficult and expensive to maintain and burn diesel fuel very inefficiently.
