

European Solar Energy Storage

Mozambique evklips energy

Overview

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

How much solar energy does Mozambique have?

Mozambique has a potential solar energy yield estimated between 1,785 and 2,206 kWh/m²/year, resulting in a solar energy potential of 23,000GWh/year. In August 2019, the first grid-ready solar power station, the 40 megawatts Mocuba Solar Power Station, in Mocuba District, Zambezia Province, achieved commercial commissioning.

How much electricity does Mozambique use a year?

In 2018, with an "average operating generation capacity of 2,279 MW", the country had an electricity consumption of 415 kWh per person, per year, about 50 kWh higher than the then prevailing average for Sub-Saharan Africa. It is estimated that 85 percent of electricity consumption in Mozambique is consumed by industry.

What is the largest power station in Mozambique?

The 2,075 megawatts Cahora Bassa Hydroelectric Power Station (CBHPS) across the Zambezi River, is the largest power station in Mozambique. The power station is operated by Hidroelectrica de Cahora Bassa (HCB), a Mozambican parastatal company.

Does Mozambique have electricity tariffs?

The average Mozambican domestic consumer cannot afford the electricity tariffs, although they are heavily subsidized by the government of

Mozambique. Mozambique is a net exporter of electricity to the members of SAPP, primarily South Africa.

What drives network expansion in Mozambique?

Network expansion is driven by industry and business growth. The average Mozambican domestic consumer cannot afford the electricity tariffs, although they are heavily subsidized by the government of Mozambique.
