

European Solar Energy Storage

Mundo solar Finland

Overview

Solar energy in Finland is used primarily for water heating and by the use of to generate electricity. As a northern country, summer days are long and winter days are short. Above the , the sun does not rise some days in winter, and does not set some days in the summer. Due to the low sun angle, it is more common to place solar panels on the south side of buildi.

Who is solar Finland?

The story of Solar Finland started in 1978 when the founders begun importing solar energy components to Finland. At first while the market was quite small, products were sold only to be used in summer cottages, boats, and mobile homes.

What is solar energy used for in Finland?

Solar energy in Finland is used primarily for water heating and by the use of photovoltaics to generate electricity. As a northern country, summer days are long and winter days are short. Above the Arctic Circle, the sun does not rise some days in winter, and does not set some days in the summer.

How much solar power does Finland produce in 2022?

The Finnish Energy Authority states that in 2022, solar power production amounted to nearly 635 megawatts - more than a 240 megawatt increase compared to the previous year. Finland still produces fairly little solar electricity compared to leading European countries. The Netherlands, in contrast, produce over seven times more per capita.

Why should you choose solar Finland?

Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad.

Does Finland have a solar heating system?

Thus, Finland has installed 10% of its objective in 11 years time (1995–2010). The solar heating has not been competitive due to cheap alternatives (electricity, fuel oil and district heating) and the lack of support systems. Companies and public organizations may receive 40% investment subsidies, but private houses do not receive subsidies yet.

Which countries install solar panels in Finland?

Austria, Denmark, Estonia, Fi. List of Finnish solar panel installers - showing companies in Finland that undertake solar panel installation, including rooftop and standalone solar systems.
