

## European Solar Energy Storage

# Narad power europe energy storage service center

## Overview

---

What services does Narada Europe offer?

Our services include battery-based energy storage solutions for active and backup power, as well as solar power facilities and installations. Narada Europe provides smart energy storage solutions for businesses, covering research and development, production, system integration, and intelligent operation of energy storage products.

What is Narada energy storage?

Global installed capacity is up to 8 GWh, and energy storage services benefit more 40 countries. With more than 17 years' experience in energy storage, Narada becomes the integrator of battery energy storage system technologies. Constantly focus on three application fields: power generation, grid and users.

What does Narada power do?

Narada Power long dedicates to new electric energy storage. Its business covers integrated solutions of R&D and production, system integration and smart operation of energy storage products.

Who is Narada power supply?

Narada has been providing industrial backup power supply for over 27 years and operates in 158 countries and regions worldwide, with Narada Europe operating and serving large blue chip companies since 2005. We are proud to say that our brand is well-established in the backup power supply industry.

Who is Narada Europe?

Narada Europe provides industry-leading commercial backup solutions. Our integrated infrastructure systems are perfect for creating a seamless power backup system for leisure centres, hospitals, business centres and hotels. Our process is fully managed; we provide all the necessary hardware, installation,

and after-sales customer care service.

Does Narada Europe offer a home power backup system?

Narada Europe offers a hassle-free home power backup supply system in various package types including – Solar panels, backup battery supply units and car chargers. All of our systems include an inverter. We will provide a bespoke quote based on your requirements and handle the installation process.
