

## European Solar Energy Storage

# National energy administration energy storage documents

## Overview

---

Seven of the announced standards relate to energy storage, covering areas including supercapacitors for electric energy storage, code specifications for traceability of electrochemical energy storage systems, design specification for electrochemical energy storage stations accessing the grid, and design specification for distributed electrochemical energy storage systems accessing the distribution network.

### New Energy Storage Policies Drive Market Changes Under China's 136 Document

This document was released by the National Development and Reform Commission and the National Energy Administration in February 2025. It emphasizes the establishment of energy storage as a fundamental aspect of new energy projects, alongside grid connection and other preliminary conditions.

### The National Energy Administration has issued: "Technical ...

This document is applicable to the site selection, layout, and fuel storage and safe storage of fuel storage areas for biomass power plants with a capacity of 12MW and above (excluding temporary storage areas).

### National Energy Administration Of China: New Energy Storage

...

In terms of technological routes, multiple compressed air energy storage, flow battery energy storage, and sodium-ion battery energy storage projects have been commissioned, exploring network-type energy storage applications and ...

## CHINA'S ACCELERATING GROWTH IN NEW TYPE ...

Technological breakthrough and industrial application of new type storage are included in the 2023 energy work of the National Energy Administration (NEA).<sup>2</sup> Energy electric industry is required to develop safe and economical new types of energy storage batteries.

## Intensive Policy Releases Transform China's Energy Storage ...

The combined effects of Document 136 and Document 394 essentially aim to eliminate excesses in the energy storage industry, marking a critical transition from policy-driven growth to market-driven dynamics in China's energy storage sector.

## 35.3GW/77.68GWh! National Energy Administration Announces Latest Energy

The document aims to standardize the grid connection access of new energy storage and promote its efficient dispatch utilization, setting specific requirements for power grid companies, power dispatch organizations, and new energy storage project units.

## China National Energy Administration Released Official Report

China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first

official and comprehensive government report dedicated to the country's rapidly advancing new energy storage (NES) sector.

## National Energy Administration (NEA) Announces Approval of Seven Energy

On November 27, the National Energy Administration released its No. 5 announcement for 2020, approving 502 energy industry standards. Seven of the announced standards relate to energy storage, covering areas including supercapacitors for electric energy storage, code specifications for traceability

## The National Energy Administration releases important document ...

The National Energy Administration releases important document supporting aggregated energy storage and integrated photovoltaic energy storage:
