

## European Solar Energy Storage

# National energy storage field distribution map

## Overview

---

What is an energy infrastructure map?

The map enables users to visualize the geospatial location of various energy infrastructure assets and explore attribute data on individual features. The data layers are developed by U.S. Energy Information Administration or from other publicly available data.

What is the All Energy Infrastructure web mapping application?

The All Energy Infrastructure web mapping application is a map of all U.S. energy infrastructure that EIA has available in geospatial format. The map enables users to visualize the geospatial location of various energy infrastructure assets and explore attribute data on individual features.

What is the US Energy Atlas?

The U.S. Energy Atlas is a comprehensive reference for data and interactive maps of energy infrastructure and resources in the United States. Check back in for further updates as we continue to expand and enhance EIA's data and mapping capabilities. NEW! Renewable Electricity Infrastructure and Resources Dashboard.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Where can I find NatCarb data?

Explore Geocube: NETL's geospatial mapping portal to view and download the Natcarb Database and other spatial carbon storage data resources. Visualize and download the NATCARB Database on Geocube. Carbon Storage Atlas V

Open-source data collection from public websites, databases, and EDX on GeoCube.

## National energy storage field distribution map

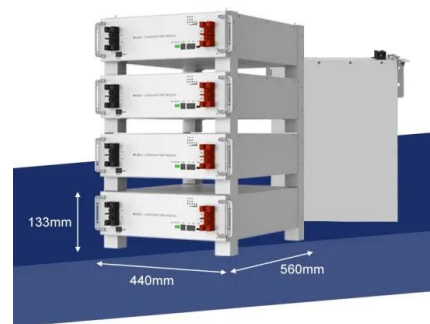

### US Energy Atlas

This dashboard will consolidate the previous Biomass, Geothermal, Hydroelectric, Wind, and Solar maps into one new product that includes a map as well as charts and tables.

### U.S. Atlas of Electric Distribution System Hosting Capacity Maps

Map of states with at least one public hosting capacity map useful for integrating renewable and efficient energy into utility distribution systems. As of May 2024, 58 utilities and state agencies have published maps in 26 states, Washington, D.C., and Puerto Rico.

### Home Energy Storage (Stackble system)

- High Efficiency
- Easy installation
- Safe and Reliable
- Perfect Compatibility

- Product Introduction**
- Scalable from 10 kWh to 50 kWh
  - Self-Consumption Optimization
  - Integrated with inverter to avoid the compatibility problem
  - LFP battery, safest and long cycle life
  - Backside design, effortless installation
  - Capable of high Powering
  - Emergency-Backup and Off-Grid Function

### Energy Storage Strategy and Roadmap , Department ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

### Carbon Transport and Storage Atlas and Data Resources

The DOE Carbon Storage Atlas provides a coordinated update of CCS potential across the U.S. and other portions of North America. DOE has released five versions of the atlas, with the most recent being Atlas V, made available in 2015.

[NATCARB/ATLAS , netl.doe.gov](https://netl.doe.gov/NATCARB/ATLAS)

Atlas V contains updates to the carbon dioxide (CO<sub>2</sub>) storage potential for the United States and updated information on DOE's carbon storage activities and field projects.

## All Energy Infrastructure and Resources

The All Energy Infrastructure web mapping application is a map of all U.S. energy infrastructure that EIA has available in geospatial format. The map enables users to visualize the geospatial location of various energy infrastructure assets and explore attribute data on individual features.

## U.S. Atlas of Electric Distribution System Hosting ...

Map of states with at least one public hosting capacity map useful for integrating renewable and efficient energy into utility distribution systems. As of May 2024, 58 utilities and state agencies have published maps in 26 states, Washington, ...

## Energy Storage Strategy and Roadmap , Department of Energy

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

## [Sandia National Laboratories](#)

The DOE Global Energy Storage Database provides research-grade information on grid-connected energy storage projects and relevant state and federal policies. All data can be exported to Excel or JSON format.
