NaWaTechnologies

Nawa Technologies is developing and industrialising a unique electrode material that combines the best nano and clean technologies: the Ultra Fast Carbon Battery. Much more than just an ...

English Portal

The company is developing and commercializing batteries with higher capacities, faster charging speeds, and longer lifespans. Its electrode material made from aligned carbon nanotube mats is helping revolutionize batteries. NAWATEchnologies is leveraging a technology developed over 20 years of CEA research conducted in collaboration with

[Demain] Nawa Technologies : penser le stockage d ...

Nawa a fait sensation au dernier CES de Las Vegas en présentant NAWA Racer e-bike, une moto électrique intégrant un système de stockage hybride unique combinant les supercondensateurs NAWACap avec ...

NAWAH, making the impossible by sculpting carbon at nanoscale

NAWA's innovation is based on an innovative approach to the nanometric-scale manufacture of an electrode combining NAWA's 3D nanocarbon and nanoplatinum. It ...

De la recherche à l'industrie

NAWATEchnologies est une start-up deeptech qui développe et industrialise une nouvelle génération de batteries permettant de stocker plus d'énergie, avec une vitesse de charge plus rapide et une plus grande durée de vie, grâce à un matériau d'électrode à base de tapis de nanotubes de carbone alignés. Une révolution

dans l'univers des batteries.

Comment Nawah veut rebondir des batteries dernier cri aux ...

Anciennement Nawa Technologies, ce spin-off du CEA promettait une révolution dans l'univers des batteries électriques.

[NAWA aims for 5-minute EV charge](#)

A French nanomaterials company has developed a technology that it claims can significantly increase the storage efficiency of electric vehicle batteries. NAWA Technologies' Ultra-Fast Carbon Electrode (UFCE) is a key to bringing EV battery-charging time into parity with gasoline-refueling time, while improving battery life-cycle performance

NAWAH

NAWAH , 5,758 followers on LinkedIn. Making the impossible by sculpting carbon at nanoscale , Stemming from CEA and MIT research on vertically aligned carbon nanotubes (VACNT), NAWAH is today the

NAWA-Revolutionary 3D nanocarbon World leader

NAWA Technologies was founded by Dr Pascal Boulanger and Ludovic Eveillard using a technology from the CEA with a focus on VACNT (Vertically Aligned Carbon Nanotubes) production for electrodes. June 2014. 2.5 MEUR Serie A to fund first VACNT synthesis machine. December 2018.

NAWA TECHNOLOGIES TO BEGIN MASS PRODUCTION OF

...

About NAWA Technologies NAWA Technologies' Ultra Fast Carbon Batteries are the next-generation of the ultracapacitor, featuring vertically-aligned carbon nanotube electrodes. Combined with a pioneering unique coating they can offer three-to-five times more energy than existing ultracapacitors or up to five

NAWA Technologies erfindet innovative Ultra Fast Carbon ...

NAWA Technologies will 1000mal schneller sein als andere. Die Energieexperten von NAWA Technologies haben es sich nicht nur zum Ziel

gesetzt mehr Energie in ihren Komponenten zu speichern als alle anderen Anbieter: Zusätzlich soll ihre Ultra Fast Carbon-Batterie 1000mal schneller geladen werden als eine herkömmliche Lithium-Batterie, ...
