About EnOcean

Founded in 2001 by EnOcean set out to revolutionize building automation through energy-harvesting wireless technology. EnOcean aims to enable sustainable, battery-free devices and ...

Self-powered wireless sensors for greater sustainability in

EnOcean sensors can continuously monitor the relevant environmental factors and send the measured data to the cloud or to edge components. The self-powered wireless sensors are suitable for these types of industrial applications because they can be used on moving parts or in difficult-to-access environments, e.g. to measure the flow, pressure, and ...

the new CEO of EnOcean

EnOcean has announced that Andreas Schneider, the co-founder and Chief Marketing Officer of EnOcean, assumed the duties of Chief Executive Officer on January 1, 2017. In this position, Andreas

PTM 215B - Not recommended for new designs. Will ...

EnOcean label for battery-free switches. Show the world that your products are 100% battery-free, 100% wire-free and 100% convenient.

Conditions of Sale

In general, EnOcean GmbH does not accept any returns, unless related to a defect or warranty claim as stipulated above. 9 Other Liability (1) Save as otherwise provided in these Conditions including the provisions below, in case of breach of contractual and noncontractual duties we shall be liable in accordance with the relevant statutory

EnOcean Develops Sustainable Solutions

EnOcean is the pioneer of energy harvesting and sensor-to-cloud solutions for sustainable Internet of Things (IoT) applications. For more than 20 years, EnOcean has been ...

An intelligent smart home solution for vacation homes

Smart building automation is particularly in demand, also for vacation homes or recreation parks with accommodation facilities. Jeroen van de Vorst, Co-owner at SmartStay B.V., has developed an intelligent and increasingly popular solution using EnOcean technology and sourcing products from Rutronik, a global distributor of EnOcean.

Smart Buildings im Kontext von New Work

Der Wandel wirkt sich auch auf die Gebäude aus, in denen die Arbeit geleistet wird. Daher rücken Konzepte für New Work sowie Smart Buildings stärker in den Fokus der Bau- und Immobilienbranche. Der Begriff „New Work“
