New Zealand clr energy

Overview

Can New Zealand achieve 100% renewable electricity by 2025?

Initially, the New Zealand Energy Strategy 2011–2021 established a target of achieving 90% renewable electricity by 2025. This target was subsequently broadened to an aspirational goal of attaining 100% renewable electricity by 2030.

Why is New Zealand transitioning to a highly renewable electricity system?

New Zealand is transitioning to a highly renewable electricity system. This change will require increased and accelerated investment in new electricity generation to match demand growth and the retirement of thermal power plants.

Who is responsible for energy use in New Zealand?

The Ministry of Business, Innovation and Employment is responsible for economic issues surrounding energy use and the Ministry for the Environment addresses the environmental cost of energy use in New Zealand. Exploration and production of fossil fuels comes under Crown Minerals, a division of the Ministry of Economic Development.

What energy sources are used in New Zealand?

Electrical energy in New Zealand is mainly derived from renewable energy sources such as from hydropower, geothermal power and wind energy. The large share of renewable energy sources makes New Zealand one of the most sustainable countries in terms of energy generation.

How can the IEA help New Zealand manage its energy sector?

In this report, the IEA provides energy policy recommendations to help New Zealand effectively manage the transformation of its energy sector in line with its climate targets. New Zealand has set ambitious targets for reducing greenhouse gas emissions, including achieving net zero emissions by 2050.

When will the New Zealand energy strategy be published?

We will be updating this page over the course of the year. The strategy will be published by the end of 2024. The Government is developing the New Zealand Energy Strategy to support the transition to a low emissions economy, address strategic challenges in the energy sector, and signal pathways away from fossil fuels.
