New Zealand felton energy

Overview

Is New Zealand's energy sector stalled by a supply-demand standoff?

New Zealand's energy sector is stalled by a supply-demand standoff, but there are ways to stimulate growth and attract investment. In brief : While New Zealand's energy supply side challenges capture headlines and headspace, the demand side of the equation is often overlooked.

What are New Zealand's energy supply and demand challenges?

In brief : While New Zealand's energy supply side challenges capture headlines and headspace, the demand side of the equation is often overlooked. High electricity prices and recent policy shifts make it challenging to attract and retain industrial customers.

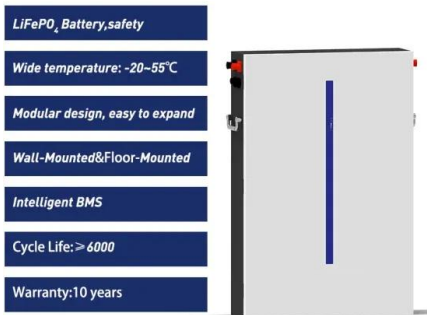

Does Aotearoa New Zealand need electricity?

Aotearoa New Zealand's shift from an industrial and manufacturing-based economy to one centred around services has led to modest demand for electricity, compared to forecasts.

What percentage of New Zealand's electricity is generated by geothermal?

Data from the Ministry of Business, Innovation and Employment (MBIE) reveals that 60% of New Zealand's electricity in 2023 was generated through hydropower, 18% through geothermal, 9% through gas, 7% through wind and just over 2% from coal. The early 2010s saw an uptick in investment in renewable energy projects, particularly in geothermal assets.

New Zealand felton energy

The future of energy in New Zealand

Where our energy comes from. Around 60% of New Zealand's energy is supplied by fossil fuels. Once energy losses and distribution are taken into account, fossil fuels make up about 70% of our total final consumption. This includes petrol and diesel for vehicles, coal and gas for industrial boilers and household gas and LPG.
